

# **ARENCO FIRE FIGHTING LLC**

## **COMPANY PROFILE**

## ABOUT US

Arenco Fire Fighting LLC is one of the fastest growing Fire Protection, Engineering, Supply and service Company offering a total solution for client's system and equipment needs. We have a client base which is covered in all major sectors. Arenco Fire Fighting operates across the United Arab Emirates in all key areas.

*“Making the place around you Safer”*

## CHAIRMAN'S MESSAGE

Safety today has a higher relevance anywhere we live or work. We, at Arenco Fire Fighting LLC strive and work hard for a safer environment for all our clients and customers to make their workplace or home a “Safer place”.

In our drive towards perfection and uncompromising quality we are constantly looking forward to building long-term customer relationships. The commitment and sincerity of our team is an integral factor of our success and reflects in every project we undertake. These values have seen us earn the trust of customers, suppliers and contractors. Eventually it is giving our customer's needs true satisfaction that gives us pride and joy.

It gives me great pleasure to lead a highly skilled and resilient team and hope this hard work will reflect in every step we take to build our future.

- **ABDUL RAHIM OBAID ABDULLAH AL BEDWAWI**

## PRODUCTS AND SERVICES

### *Conventional & Addressable Fire alarm system*

Arenco Fire Fighting LLC provides fire safety equipment, including the supply and installation of fire alarms. In commercial buildings fire alarms are not just necessary for their practical benefits, but are also a necessity by law. In order to fulfill all

your legal and contractual obligations you must ensure you have effective high quality fire alarm systems. We provide the supply, installation and maintenance of fire alarm systems.

### *Fire Pumps and Fire Hose Reels*

We offer complete installation of wet and dry riser fire hydrant systems, hose reel systems and sprinkler systems. Fire hydrant/hose reel systems as an installation of pipes, water

tanks, pumps, hydrant outlets and/or hose reels in a building to provide a ready means by which a jet of water can be delivered to any part of the building for the purpose of firefighting. We provide a comprehensive range of related services including design, supply, installation, testing and maintenance.

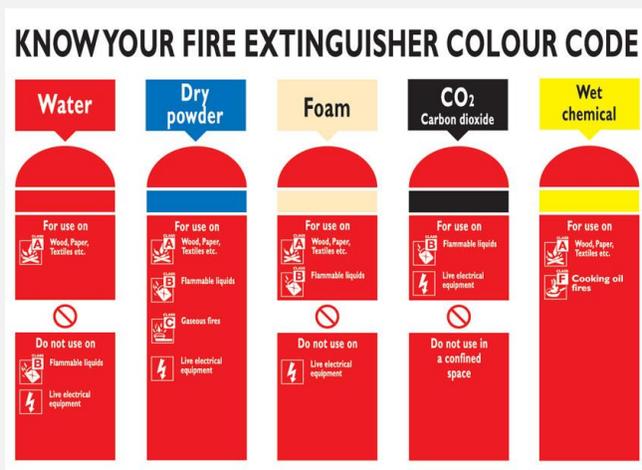

## Water & Foam Sprinkler System

Properly installed and maintained automatic fire sprinkler systems help save lives. Because fire sprinkler systems react so quickly, they can dramatically reduce the heat, flames and smoke produced in a fire. Fire sprinklers have been around for more

than a century, protecting commercial and industrial properties and public buildings.

## Portable and Mobile Fire Extinguishers

High quality fire protection equipment is a necessity for any commercial building. We are comprehensive suppliers of the most superior fire extinguishers from the most established manufacturers. We supply all kinds of fire extinguishers:

Foam extinguishers, Water extinguishers, CO<sub>2</sub> extinguishers, Powder extinguishers, Automatic extinguishers and Wet Chemical Extinguishers.

## *CO2 & Foam Systems*

Foam Fire Extinguishing System  
Foam used in fire protection is an aggregate of air-filled bubbles formed from aqueous solutions, and is of lower density than the lightest flammable liquids. It is mainly used to form a coherent floating blanket on flammable and combustible liquids to prevent or

extinguish fires by excluding air and cooling the fuel. Foam can be used as a fire prevention, control or extinguishing agent for flammable liquid in tanks or processing areas.

## *Dry Powder & Water mist Systems*

The Water Mist System is unique. Water is forced through micro nozzles at very high pressure to create a water mist with the most effective fire fighting drop size distribution. The extinguishing effects give optimum protection by cooling, due to heat absorption and inverting due to the expansion of water by over 1,700 times when it evaporates.

## *Deluge & Kitchen Hood Systems*

An exhaust hood, extractor hood, or range hood is a device containing a mechanical fan that hangs above the stove or cooktop in the kitchen. It removes airborne grease, combustion products, fumes, smoke, odors, heat and steam from the air by evacuation of the air and filtration. In

commercial kitchens exhaust hoods are often used in combination with fire suppression devices so that fumes from a grease fire are properly vented and the fire is put out quickly.

## *FM-200 Gas Extinguishing System*

FM-200 is stored in cylinders as a liquid. The cylinders are pressurized with nitrogen which acts as a propelling mechanism for the discharge of the agent. As the agent reaches the discharge nozzle it is vaporized and floods the hazard area as a gas. An FM-200 system can provide an effective fire extinguishing medium with modular hardware that requires minimal space for installation and a most effective means of fire suppression.

## PREQUALIFICATION

### List of completed Projects

S.No	Projects	System
1	Chunky Chicken, Al Twar	Fire alarm & Kitchen Hood System
2	Al Futtaim Logistics	Fire Protection System
3	Imperial Heights, Business Bay	Fire alarm & Fire Fighting System
4	Al Diya Warehouse, DIP	Fire Alarm System
5	Pizza Hut, Umm Suqeim	Fire Alarm & Fire Fighting System
6	Building No.6, Dubai Design District	FM 200 Fire Suppression System
